📍 Warsaw, Poland

Software Engineer building enterprise applications using .NET and Angular. I work across the entire stack - from designing backend APIs and microservices to creating user-friendly frontends. I enjoy mentoring junior developers and tackling everything from architecture decisions to performance improvements.

Experience

from **06/2026**
to **present**

Peloton Interactive

Software Engineer

- Delivered an end-to-end playlist management workflow, eliminating manual music programming processes
- Built a real-time collaborative commenting system for an internal content platform, covering the full thread lifecycle across multiple services
- Improved music rights tracking accuracy by delivering new search and reporting features for royalties team

from **07/2023**
to **06/2026**

mBank

Software Engineer

- Implemented a backend layer for backend-driven UI for mBank's Customer Service Care module
- Migrated an application from IIS-hosted WCF services on .NET Framework 4.6.2 to private cloud using .NET 8 and Kubernetes that reduced production deployment duration by 95%
- Led the adoption of a company-wide component library in **eMakler**, increasing WCAG 2.2 AA compliance
- Improved the page loading speed by 40% by implementing state management using ngRx
- Optimized frontend pipeline configuration resulting in decreased build time from ~30 to ~8 minutes

from **09/2022**
to **07/2023**

KPMG Poland

Software Engineer

- Optimized performance of KTax, a large-scaled tax calculation software, reducing page load times by 80%
- Collaborated with QA teams and BAs to ensure tax compliance updates were delivered on schedule
- Introduced structured unit testing practices, raising coverage to 80% and improving long-term maintainability

from **04/2021**
to **09/2022**

Atinea

Software Engineer

- Automated OpenAPI client generation with NSwag, accelerating backend integration
- Developed a microfrontend architecture in Angular 12 & Single SPA, enabling independent deployments
- Migrated an API of enterprise application from VBA to REST-based one with ASP.NET
- Utilized JavaScript and PHP to develop plugins that enhanced client-specific experiences from **InstaDB CMS**

Education

Bachelor of Science in Computer Science (Information System Engineering)

Warsaw University of Life Sciences

Thesis Comparison of Microfrontend and Monolithic Frontend Applications – Expense Tracker case study
(demonstrated the slight build time and performance edge of Modular Monolith in small to medium projects)

Skills

Backend	.NET Framework, .NET Core, ASP.NET, Entity Framework, Dapper, SignalR, YARP, xUnit
Frontend	Angular, RxJs, NgRx, TypeScript, React, Redux, Jest, Vitest, Micro Frontends
DevOps	Docker and Kubernetes basics, TeamCity, Jenkins, Azure (confirmed by AZ-900 certificate)
Concepts	OOP, REST APIs, Agile, Scrum, microservices architecture
Other	Git, Azure DevOps, BitBucket, GitHub, JIRA, Confluence, MS SQL Server, Redis
